HIGHLIGHTS California's seasonally adjusted unemployment rate for June was 8.2 percent, up from the 7.7 percent in May. A year ago, in June, the rate was 5.1 percent. During June in California, seasonally adjusted employment increased by 15,000 over the month while unemployment increased by 83,000. The number of job losers decreased from 614,800 in May to 582,200 in June. The number of job leavers decreased by 25,000 during the month. The national civilian seasonally adjusted unemployment rate for June was 7.0 percent, up from the 6.9 percent in May.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 51,200 from 12,844,800 in May to 12,896,000 in June. The largest increases in employment were in the trade and services sectors with a gain of 17,800 and 17,400, respectively. Other major sectors that registered increases were construction with 8,400 additional jobs; transportation and public utilities with 3,500; finance, insurance, and real estate with 2,400; manufacturing with 1,700; and mining with 500. A loss of 13,500 jobs occurred in the education components of the government sector, although this was less than seasonally expected. After adjusting the data for seasonal variation, decreases were recorded in all major sectors except services, government, and mining. The decrease in the manufacturing sector was spread throughout most components in durable goods. Since June 1990, total nonagricultural wage and salary employment, not seasonally adjusted, has decreased by 70,400, a 0.5 percent drop over the year. During May, average weekly earnings and average weekly hours worked in manufacturing increased to $479 and 40.5, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.
